### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Group I.      Claims 1-12, drawn to an apparatus of a recycling device, classified in class 241, subclass 100;
- Group II.      Claims 13-20, drawn to a process for recycling, classified in class 241, subclass 30.

Inventions of Group I and Group II are related as apparatus and process for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus of Group I as claimed can be used to practice another and materially different process and not necessarily the specific process of Group II. For example, the apparatus of claim 1 can be used to practice another and materially different process which does not require the details of the control panel, including a first pulley, a second pulley, a flexible band, a first handle, a second handle, a first hinge, a second hinge, and a third hinge, as claimed in claim 13.

### ***Conclusion***

A telephone call was made to the attorney of record, Anthony Campbell, on February 28, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
